

Managed
Planet™
Control Your Jungle

Executive Report Pack provides useful, time-saving report features such as scheduled creation and publishing of any report. You can also create reports specific to department or organization boundaries.

The goal of **Executive Report Pack** is to enable IT asset related decisions by making sophisticated relevant reports easier, to create and distribute to the true consumers of this information.

Great new features include a robust multi-query selector for 'threshold' and cost reporting, multi-core support, and managed device event log collection, auditing, and reporting!
